

4 IVY™
10 AURA™

As today's open office environment continues to simplify and condense, and height-adjustable tables evolve into standalone workstations with privacy screens and accessible power and data access at the worksurface, the need for bulky panels that clutter the office diminishes. One key element that drives the use of panels is power supply: how do you route power and data from the desks to a power source? Many solutions have been developed, but all revert to the same industrial aesthetic of basic metal beams and rails, which struggle to provide flexibility for complex workstation planning like 90- or 120-degree configurations.

Introducing Ivy, a brilliant, open-office power and data distribution solution.

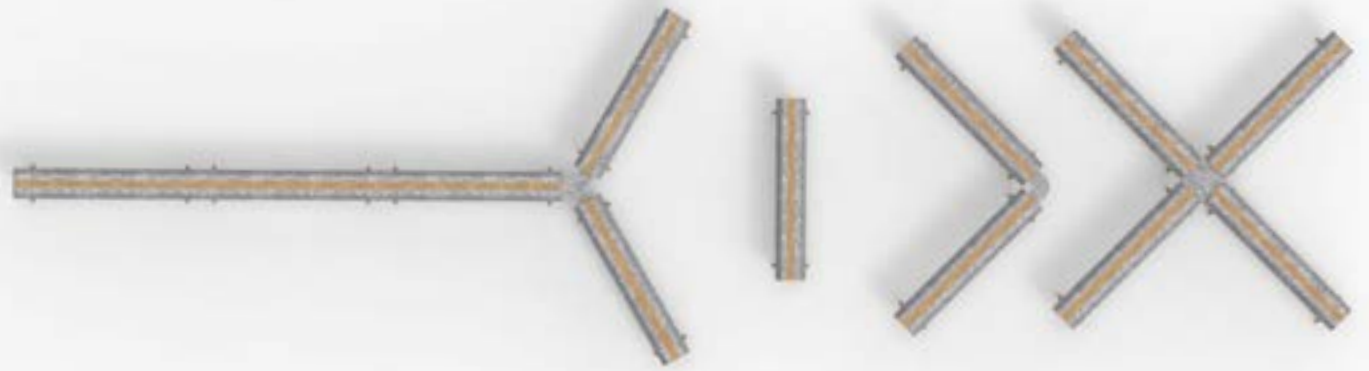

Ivy's aesthetic is purely Danish: rich woods, the supple texture of PET felt, and the strength and durability of steel, together forming an inspiring design that compliments your Danish SiS Ergo tables and enhances your 21st century open office.

A hallmark of Danish design is ingenious functionality, and Ivy delivers. In addition to straight runs of workstations, Ivy's clever Capillary System allows for 5 types of junctions in 90-degree or 120-degree angles. This combined with three different lengths (48", 60" and 72") allows for infinite space planning capabilities.

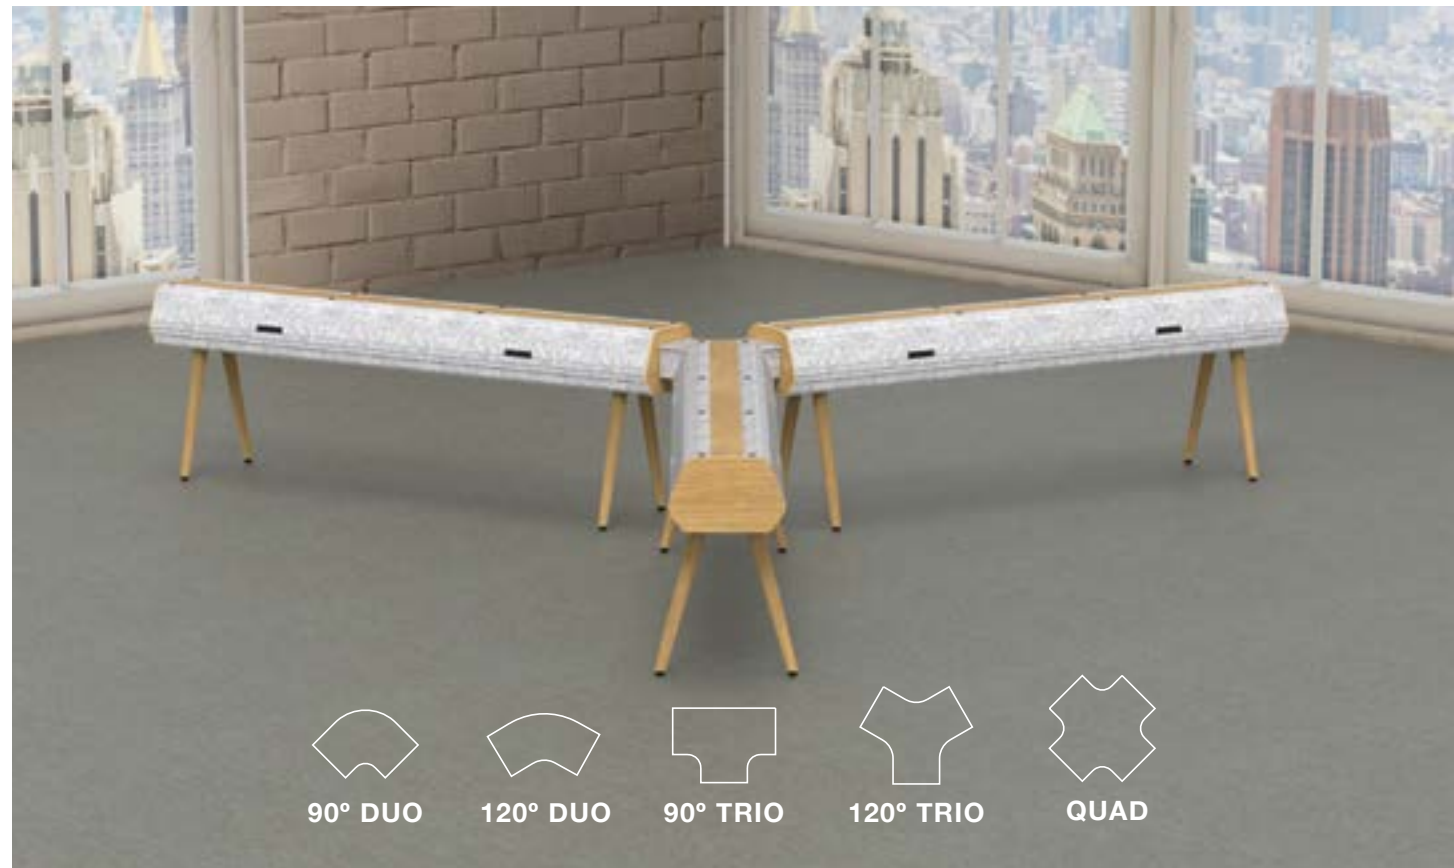

Power comes in abundance with Ivy. A single section can have up to 16 receptacles, and a total of 52 duplex receptacles can be used on a single hardwired power infeed. Power is conveniently accessed through port flaps in the PET felt material.

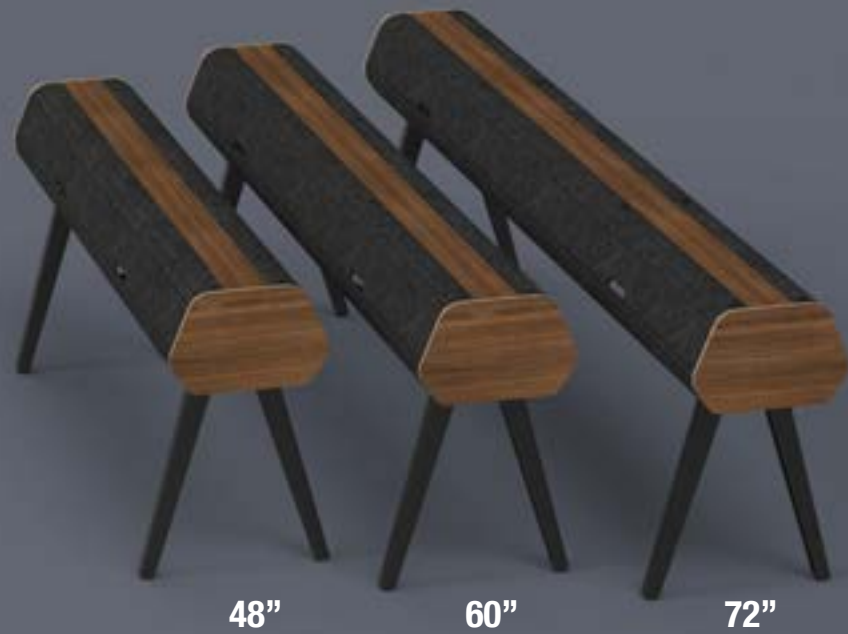

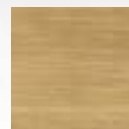

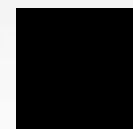

Intrinsic to Scandinavian furniture is quality. As a Danish manufacturer, SiS Ergo crafts furniture to the highest industry standards, and Ivy is no exception. Power components are backed by a 7 year warranty, and craftsmanship, like all SiS Ergo products, is guaranteed for life. Characteristic to Denmark's leadership in environmentalism, Ivy features sustainable-sourced wood and Declare-labeled PET felt.

Elevate your office with the unmatched aesthetics and planning flexibility of Ivy.

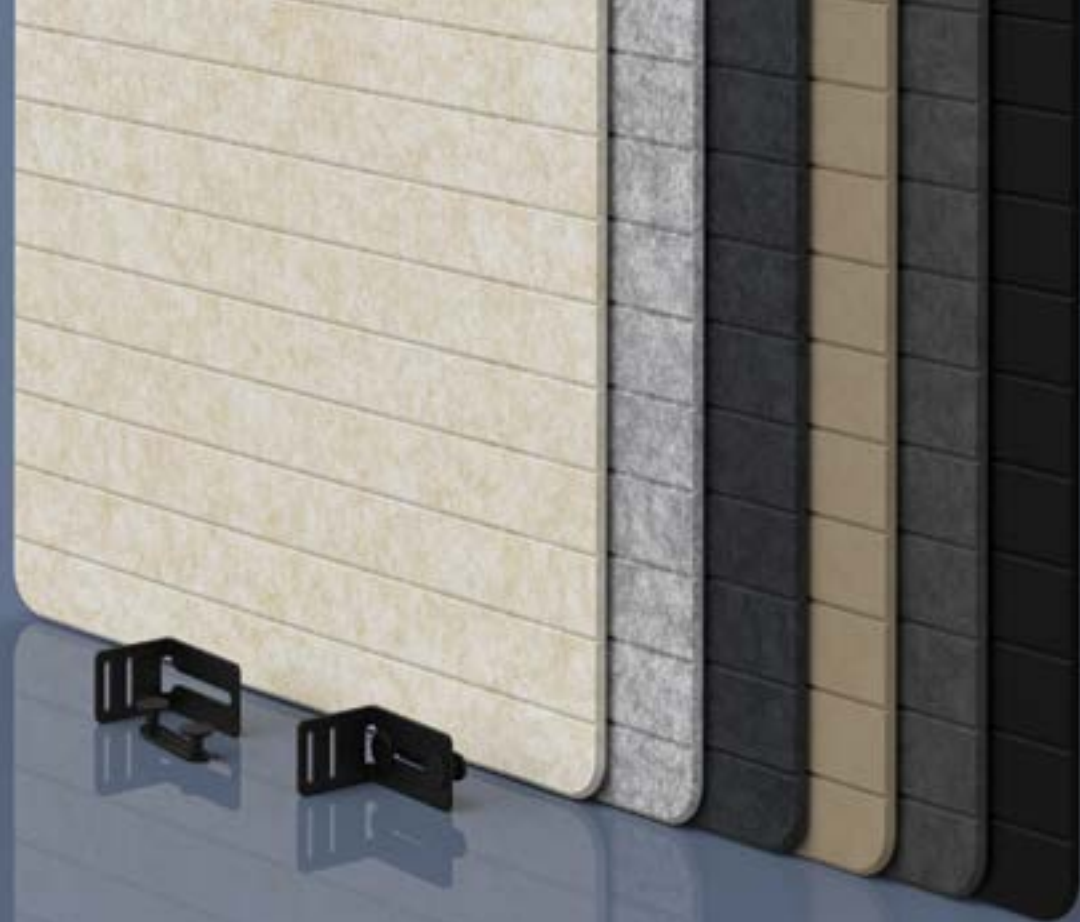

Height With Legs: 20.52"
Leg Width: 12.75"
Beam Width: 10.2"
Beam Length: 48", 60", 72"
